

Release Notes – EasySaveProSoft v2.0

Release Date

May 19, 2025

New Features

-  Graphical user interface (WPF) replacing the old console mode.
-  Unlimited number of backup jobs (no more 5-job limit).
-  File encryption using CryptoSoft, configurable by file extension.
-  Enhanced daily log file, now includes encryption time per file.
-  Automatic backup interruption when a critical software package is detected.
-  Multilingual interface: French and English support.
-  Selective encryption of files based on predefined formats/extensions.

Fixes & Improvements

-  Better error management and reporting.
-  More readable and detailed log outputs.
-  Fixed various bugs and minor glitches from version 1.0.
-  Performance improvements, especially for differential backups.
